

Vote Myron Buchholz for Congress

August 9th

JOBS: For too long have the special interests influenced the political establishment against the interests of the American workers and people. Special interest written trade agreements like NAFTA and Permanent Normal Trade Relations with China have sent high paying American jobs out of the country and lowered wages for American workers. The proposed Trans Pacific Partnership (TPP), is the largest trade agreement in history and will accelerate this trend. I am strongly opposed to TPP and will vote against its passage.

LIVING WAGES: No one working a full time job should be living in poverty. Over half of American Workers, mostly women and people of color, earn less than \$30,000 per year. We need a minimum wage of \$15 per hour and equal pay for equal work.

HEALTH CARE: Health care is a human right. I support and will work for Bernie Sanders' single payer, Medicare for all plan. It is the only way to ensure that all are covered and costs are contained.

WAR: The unnecessary and tragic war in Iraq has cost too many American soldiers and Iraqi civilians their lives. Being the father of a captain in our army, I know the worry for a child's safety. Our wars in the Middle East and else where must end. We need to talk not bomb, work with allies for stability, and bring our soldiers home.

WOMEN'S RIGHTS: Medical decisions should be left to patients and their physicians. I support and will fight for a woman's right to choose and to have access to birth control.

CLEAN ENERGY: Senator Bernie Sanders estimates that a well funded renewable clean energy program could create 5 million new high paying jobs over the next 15 years. I will fight for the immediate development of the full range of these renewable energy sources and the ending of the huge subsidies to the fossil fuel industry.
